

Lower Legform Impactor

Pedestrian Legform Impactor

for testing to GTR No. 9 and Commission Regulation (EC) No. 631/2009, EEVC WG17 and EuroNCAP

The package (sales code LG/1) consists of 1 instrumented pedestrian lower legform impactor fitted with its skin and ligaments, and supplied with transducers calibrated and fully certified. Also included are: 5 certified fleshes (supplied flat packed), 1 certification impactor face and a set of user notes.

At an additional cost, a senior engineer is available to assist with installation, set up and training. Dates are by mutual agreement, typical lead time is 3-4 weeks.

Spare parts, consumables, repair and certification services for the impactor are also available.
